

Answer

This number

Into this number →

$$56 \div 7$$

is the same as

$$7 \overline{)56}$$

### Instructions:

Print on card. Use relatively thick card. 200gsm. It will work with thinner card but you will have to be careful cutting and handling.

Cut away the blue cross—hatched areas. For the “into this” and “answer” sections on each finder, use a craft knife to cut away the middles and small detail. Handle carefully once cut!\*

Place the cut-out in the lamination pouch, being careful to position the sections so that the gap is 1 cm wide.

Laminate the multiplication tables too. These can also be used without the finder once students are familiar with the processes.

Laminate and trim excess laminate. It is also a good idea to round the sharp corners.

\*Alternatively, cut the larger section and the smaller sections separately and simply draw the “into this” and “answer” sections on the laminate once assembled.

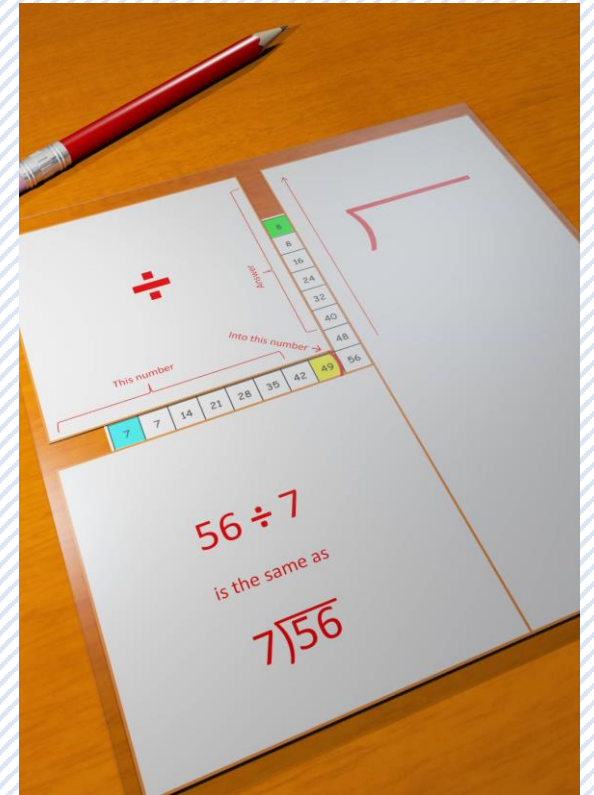

X
